

SENATOR WARNER: Could I ask Senator Stull one question?

SENATOR STULL: Yes.

SENATOR WARNER: Is the intent of your motion to only have an effect on those appropriations for the--through June 30, 1974? It was discussed a little bit earlier, there may be some enabling legislation that would have an impact at some date in the future. We excluding those too? Senator Marvel said--I understood to say yes. I wanted to be sure I understood your motion.

SENATOR STULL: Senator Warner, I would say that we would take up anything other than a bill, an A bill. Now if you want to clarify that, I think that would be in order at this time.

SENATOR WARNER: Well then your feeling is that the only bill which would not be acted on are those that would have an A bill, is that what you said?

SENATOR STULL: Yes.

SENATOR WARNER: I'm, I'm not sure that that's the same understanding that everybody has but, that's fine, I'll accept that as your definition of the motion and I assume the Chair will accept the motion in the same light that any bill that does not have an A bill could be considered on final reading.

SPEAKER: Chair accepts the motion as it is written. I don't try to interpret it. Senator Warner.

SENATOR WARNER: Would, would you read the motion then so that we can interpret it?

CLERK: Okay. The motion is: (read)

SENATOR WARNER: Senator Stull, do you mean that's the only A bill? If he'll yield.

SPEAKER: Senator Stull.

SENATOR STULL: Senator Warner. I have LB 43 up there and 43A. 43 would certainly create where you need the A bill. Now if you want to take out anything that has the fiscal impact, I think we would need to amend my amendment; the way I intended it, we would take up anything other than a bill that had or the A bill.

SENATOR WARNER: So that w--we won't get in a problem, would you wish to amend, or would you accept an amendment to strike the part and insert the exception for those bills carrying an A bill? I'm just--I'm not arguing with what we're doing, I just want to be sure that everybody, including myself, understands the ramifications.

SENATOR STULL: Senator Warner, I would say this. A bill that creates a fiscal impact would really, wouldn't have any effect without the A bill so I think the wording in my original motion, I think is clear. Now it's probably perhaps the way each individual would interpret it.

SENATOR WARNER: I'm perfectly willing to accept that your definition is or intent is to exclude only those A bills then it's perfectly satisfactory with me.

SPEAKER: Senator Whitney.

SENATOR WHITNEY: Mr. President, I think this should be clarified before we vote on this bill. Now if we have a bill like 43 and
